

Safety Syringe(Manual Retractable)

Product Advantage:

- Safe:
 - * Retractable system prevents from needle-stick injuries;
 - * Self-destroy system prevents from reuse.
- Convenient:
 - * Activate the retractable device only with one hand;
 - * Easy readability, accurate and clear scale markings.
- Low residue, low waste.

Safety Secure:

- After injection, press the plunger harder until a click is heard.
- The needle will be engaged with the plunger and tilted in the barrel as pulling the plunger back.
- Until the first groove back to its position, snap off the plunger and dispose.
- The needle will be stuck and tilted in the barrel permanently.
