

Blunt Fill Needle (with or without Filter)

Product Information:

Size: 18G×38mm; 19G×38mm
Material: ABS, PP, PC,
SUS304 Cannula, Silicone oil
Color: Pink
Filter: 5µm
Package: 1pc/blister pack, EO Sterile
Shelf Life: 5 years

Product Advantage:

- Avoid Needle-Stick Injuries: 45° angle cut on bevel reduces coring of vial stopper;
- 5 micron filter optional to capture particles during drawing up;
- Compatible with all syringes on market;
- Eliminates/Reduces risk of needle stick injuries;
- Sterile, single-use and latex free;
- Conformed with ISO 13485 and ISO9001 Quality System.

Intended Use:

Blunt Needles (with or without filter) are used for the draw-up of medication, re-constitution of medication and for accessing IV bags. Blunt Needles(with or without filter) are often used to replace standard hypodermic needles during draw-up to further reduce the risk of needle stick injuries.
